

# Sharp Rise in Double Mastectomies

*As this infographic shows, the rate of double mastectomies per 100,000 women more than tripled between 2005 and 2013.*

*Mastectomies overall – both single and double mastectomies – increased 36 percent during that period. The rise in mastectomies occurred despite breast cancer rates remaining constant.*

2005
