More adults report always being asked to teach back providers’ instructions

To start teach-back, providers ask patients to explain *in their own words* what they need to know or do. This approach helps determine whether patients and family members clearly understand what doctors tell them.

More adults get teach-back

Who was more likely to get teach-back in 2015?

- People with less than a high school education: 37.8%
- Blacks: 39.9%
- Hispanics: 39.4%
