

Question Builder

An AHRQ App for Digital Healthcare

The AHRQ Question Builder app helps patients and caregivers prepare for medical appointments and maximize visit time. It's as easy as 1-2-3:

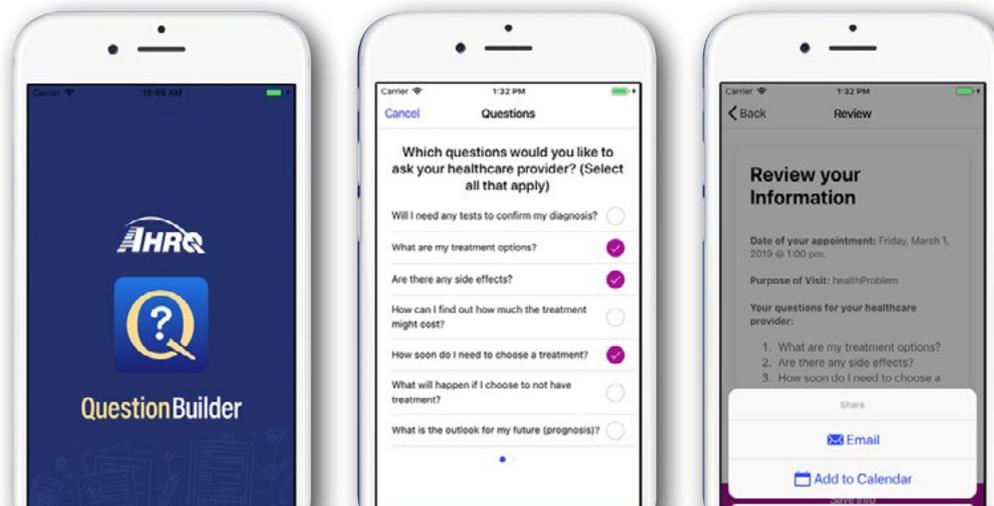

- 1** Download the mobile app using the QR codes below
- 2** Select or create questions to ask
- 3** Save the questions to a calendar appointment or send them to any email address so that the information is handy during medical visits*

Use the Question Builder app to:

- Prepare and organize questions by type of medical encounter
- Take photos of insurance cards, pill bottles, or even a skin rash
- Access consumer education materials and videos

The evidence-based content and questions created with the app are available at no charge for phones, tablets, or laptops via both iOS and Android operating systems.

* All input resides on users' own devices; nothing is stored in the app.
