

Strategic Framework to Guide AHRQ's PCORTF Investments

MISSION

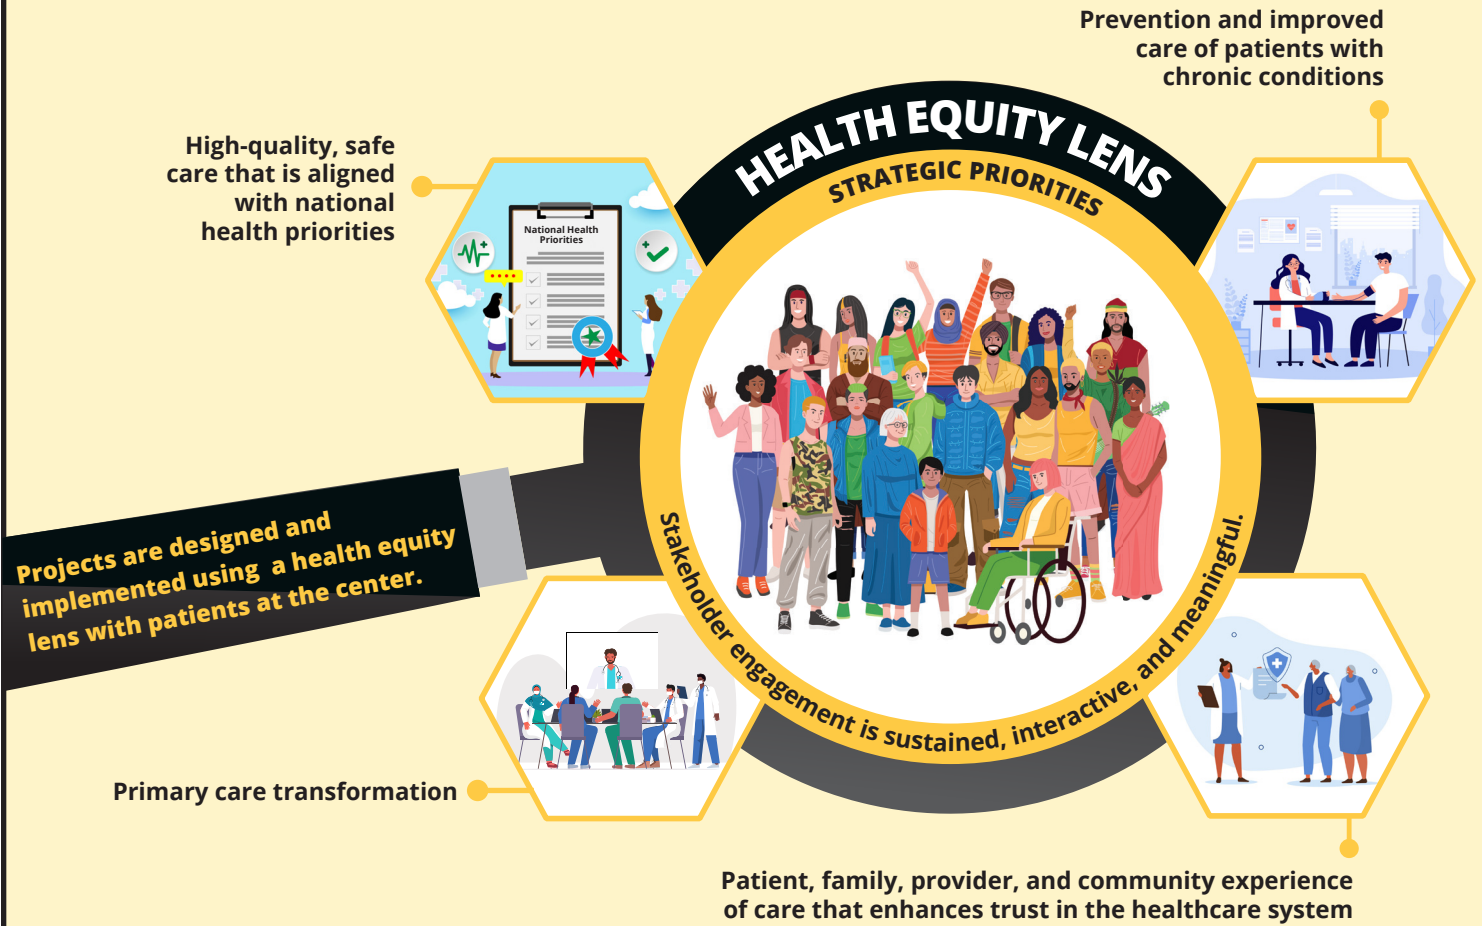

Dissemination and implementation of evidence into practice and train the next generation of patient-centered outcomes researchers

VISION

Equitable, whole-person care across the lifespan that acknowledges the impact of community and social context on patient health

GOAL

Improve health outcomes by promoting safe, affordable, evidence-based, integrated, coordinated, team-based, patient centered care with a focus on underserved populations

CROSS-CUTTING STRATEGIES TO ACHIEVE EQUITABLE, WHOLE-PERSON CARE ACROSS THE LIFESPAN

Build national capacity to rapidly disseminate and implement PCOR evidence into practice

Apply an equity framework to all projects

Synthesize evidence that is important to patients and key stakeholders with attention to AHRQ's priority populations

Disseminate evidence to key stakeholders in accessible and actionable formats

Support implementation of evidence into practice at state and local levels

Leverage and support innovation in digital health, clinical decision support, and new models of care

Support Learning Health System capacity to collect, analyze, harmonize and share actionable data with stakeholders to improve essential health outcomes

Work with federal, state, and other partners to fund evidence creation, communication, and targeted dissemination to inform health policy

Train and support the next generation of health services researchers with a focus on team science, understanding community needs, and advancing health equity

Evaluate the impact of PCORTF investments on care delivery, quality, costs, health outcomes, and health inequities
