**Phase 2 “Deep Dive”: Practice participation to decrease ED rates for patients with asthma (based on using the PQMP asthma measure)**

1. **Step 1**: Does the practice have an asthma registry?
   - **Yes**
   - **No**

   - **Can the practice identify children with asthma presenting to ED?**
     - **Yes**
     - **No**

     - **Does the practice have access to ED or urgent care data?**
       - **Yes**
       - **No**

       - **Practice IT specialist generates report of children from the practice seen in the ED/urgent care based on practice**

       - **Step 2**: Chart review of at least 25 children presenting to the ED in the last 6-12 months for asthma using Practice Asthma Data Collection Tool.

       - **Use descriptive statistics to identify causes for ED visits for asthma.**

       - **Step 3**: Practice reviews key practice-wide process measure performance.

   - **A sponsor would need to provide a list of children who presented to the ED for asthma in the previous 6 months.**

   - **Step 2**: Chart review of at least 25 children presenting to the ED in the last 6-12 months for asthma using the Practice Asthma Data Collection Tool.

   - **Use descriptive statistics to identify causes for ED visits for asthma.**

   - **Step 3**: Practice reviews key practice-wide process measure performance.

   - **Improvement team formed to identify SMART Aims and Measures and to initiate Quality Improvement activities.**
