

## ACKNOWLEDGMENTS

Several organizations have collaborated to design, pilot, and further refine TeamSTEPPS™ to make it available for all healthcare organizations. Many individuals contributed a great deal of their time and expertise to the development of the TeamSTEPPS Rapid Response System Instructor Guide and its accompanying wealth of materials by developing an evidence-based framework, providing validated measurement tools, incorporating adult-learning methodologies and medical illustrations, reviewing content or making recommendations about the style, identity, terminology, design, and format. For their expert input to this curriculum, we would like to thank:
