

Prevention Is Key to a Healthy America

Vaccines. Screening tests. Preventive medications. Counseling for healthy behavior. All are clinical preventive services that your health care team can give you. But clinical preventive care works only if the right people get the right care at the right time.

Is it provided as recommended?

42,000 
lives saved

because children get their recommended vaccinations.¹

Is it fair?

Only 46%

of blacks—and 67% of whites—get the pneumococcal vaccine advised for *all* seniors.²

Is it safe?

950,000+

men had unneeded prostate cancer treatment after PSA testing was introduced.³
