VTE Risk Assessment Tool—for patients ADMITTED (not OBS or same day surgery) to UCDMC and who are expected to be hospitalized for more than two days.

**HIGH Risk Factors for VTE**
- Major Lower Extremity or Pelvic Orthopedic Surgery
- Neurosurgery Procedure
- Major Spine Surgery
- Acute Spinal Cord Injury
- On Ventilator
- Active Cancer
- Acute stroke with hemiparesis

**Moderate Risks for VTE**
- Prior DVT/PE
- Inflammatory Disorder (SLE, RA, Crohn’s Ulcerative Colitis)
- Immobile**
- Major Surgery within prior 7 days
- Infection requiring IV Antibiotics

1. **Does the patient have 1 or more HIGH Risk Factors?**
   - **YES**
     - **HIGH RISK**
       - Pharmacologic Prophylaxis AND Mechanical Prophylaxis
       - (Unless either or both contraindicated)
   - **NO**
     - **MODERATE RISK**
       - Pharmacologic Prophylaxis ONLY
       - (When pharmacologic prophylaxis contraindicated—use Mechanical Prophylaxis)
     - **LOW RISK**
       - No Prophylaxis required
2. **Is the patient MOBILE**?
   - **YES**
     - **MODERATE RISK**
     - Pharmacologic Prophylaxis ONLY
   - **NO**
     - **HIGH RISK**
     - Pharmacologic Prophylaxis AND Mechanical Prophylaxis
     - (Unless either or both contraindicated)
3. **Does the patient have 1 or more MOD Risk Factors?**
   - **YES**
   - **NO**

**Minimum Criteria for MOBILITY =** Walks occasionally for short distances, with or without assistance. May spend most of the day in bed.
