

Tips About Health Insurance

- Your baby will need to visit the doctor regularly after birth.
- You have only 30 days to add your newborn to your insurance plan. Call your current insurance company as soon as possible to add your newborn.
- Ask your social worker if you qualify for Medicaid, and apply while your baby is still in the hospital.
- Ask about Children's Medicaid (CHIP), Project Medical Home, and other low-cost health care benefits if you do not qualify for Medicaid.
