

Surveys on Patient Safety Culture®

Surveys on Patient Safety Culture® (SOPS®) Workplace Safety Supplemental Items for Nursing Homes: 2025 Updated Results

The Workplace Safety Supplemental Items for Nursing Homes assess the extent to which the organizational culture of a nursing home supports workplace safety for providers and staff. The 2025 updated results include data from:

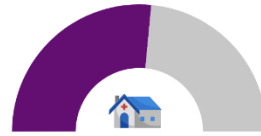

72

Participating Nursing Homes

3,683

Provider and Staff Respondents

53%

Average Nursing Home Response Rate

Highest Composite Measure: Moving, Transferring, or Lifting Residents

89% of respondents agreed that equipment or assistive devices are available, in good working condition, and staff use them when needed.

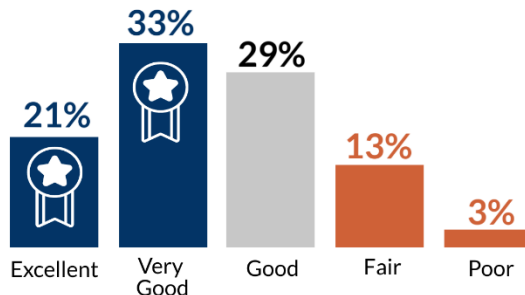

Lowest Composite Measure: Interactions Among Staff

57% of respondents agreed that staff are not rude to, or bully, other staff.

Overall Rating on Workplace Safety for Staff

55% of respondents rated workplace safety for staff as Excellent or Very Good.

Note: Percentages indicate the database average percent response for each response option. The percent positive displayed might not equal the sum of the separate response option percentages due to rounding. Percentages might not add to 100 due to rounding.

What's Next? Action planning for patient safety improvement

The *Action Planning Tool for the AHRQ Surveys on Patient Safety Culture* provides step-by-step guidance on how to develop an action plan to improve patient safety culture, available at www.ahrq.gov/sops/resources/planning-tool.
